

SAN GABRIEL CHRISTIAN SCHOOL

SINCE 1949

COVID-19 Containment, Response and Control Management Plan

The COVID-19 Compliance Team consists of:

Chesed Bialon – Principal

Chris Sykes – Assistant Principal

Conor Smith – Facilities Supervisor

Jon Bialon – School Operations Manager

This team will establish and enforce all COVID-19 safety protocols for San Gabriel Christian School.

Steps to be taken if any member of the school community (faculty, staff, student or visitor) tests positive or has symptoms consistent with COVID-19:

- The member of the school community will immediately separate from others, and self-isolate at home.
- If a person is found to have symptoms and is notified of a positive test result while on campus, they will be isolated temporarily in Room S-11 until arrangements can be made for them to return home. A student will be supervised by a social distanced staff member using PPE.
- Informational material regarding COVID-19 and home isolation will be given to the person exhibiting symptoms or testing positive, or to a family member if a child is involved.
- School informs the case that DPH will contact the case directly to collect additional information and issue Health Officer Order for Isolation.
- School works with the case to identify school contacts.
- School notifies school contacts of exposure and instructs them to quarantine at home and test for COVID-19. (Note: Asymptomatic persons who are fully vaccinated and have an exposure are recommended to test but are not required to quarantine. Asymptomatic persons who have been diagnosed with COVID-19 within the last 19 days and have an exposure are not required to quarantine or test for COVID-19.)
- School informs school contacts that DPH will contact them directly to collect additional information and issue Health Officer Order for Quarantine.
- School submits a report to DPH within 1 business day with information on the confirmed case and persons who were exposed to the cases at the site.

- School sends general notification to inform the school community of the school exposure and precautions taken to prevent the spread.
- If 2 cases occurred within 14 days of each other, school works with DPH to determine whether the cases have epidemiological links. If epidemiological links exist, school implements additional infection control measures.
- Any cluster of 3 or more cases in 14 days of each other, school immediately notifies DPH.
- DPH determines if the outbreak criteria have been met. If outbreak criteria are met, a DPH outbreak investigation is activated and a public health investigator will contact the school to coordinate the outbreak investigation.

Additional precautions:

- School personnel will be sent to their primary care physician for COVID testing when instructed to do so by the Department of Public Health based on local disease trends or if there is an outbreak at the school. The school will send results to the DPH.
- Employees over 65 and those with chronic health conditions that make them at high risk for infection may be assigned work that can be done at home.
- Workspaces for staff as well as classrooms have been set up for social distancing and will be regularly cleaned and disinfected.
- All employees have been trained in COVID protocols and have been provided with information on what to do if they become ill.
- The school facilities will not be used for non-school purposes. No events or outside group use will be permitted.
- Employee health screening will be done daily before employees may enter their school workspace. Signs are posted with health questions, and temperatures will be taken daily before the start of work.
- Face coverings, hand sanitizer and gloves are available for those in need of PPE.
- Medical grade masks and other PPE are available to staff that have come in contact with sick children.
- All employees, vendors and delivery personnel are provided with instructions on physical distancing, and face coverings when around others on campus.
